

mag-flexx SATURN

assembly instructions

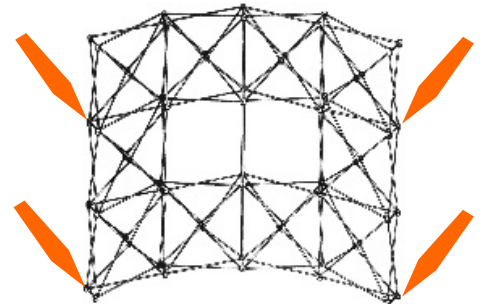

1. place the frame on the floor
2. locate the two tabs in the middle (marked: HIER ANHEBEN - lift here) and pull upwards to unfold the frame

3. close the middle spacing spoke
4. close the other spacing spokes

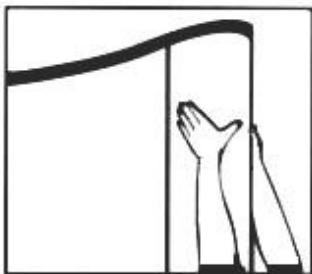

5. take the metal bars out of the case, fix them together by pushing them into the positioning node (from bottom to top) first into the node, then into the bottom one

6. to mount the spotlights, fix the flange to the horizontal bar and set up the spotlights
7. Point the spotlights towards the middle of the frame

8. hang the front panels from the top and straighten them, to adjust them always release them at the bottom along the strengthened magnetic strip (do this for hanging all panels)

9. hang the side panels from top to bottom, fixing the magnetic strips with your hands on both sides simultaneously
10. remove the protective plastic cover from each panel from bottom to top and hang the panels

- Dismantling tips:
- roll panels ONE AT A TIME
 - remove ALL spotlights
 - ALWAYS roll the panels with the picture on the outside
 - open ALL spacing spokes, then fold the frame down
