

mag-velo SATURN

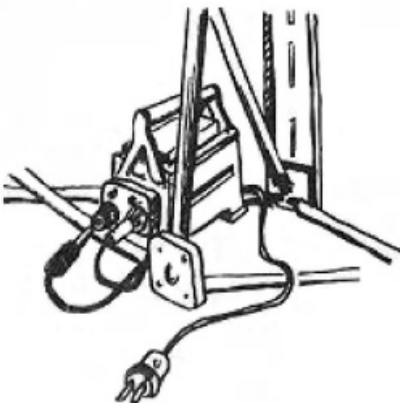

assembly instructions

1. place the frame on the floor
2. locate the two tabs in the middle (marked: HIER ANHEBEN - lift here) and pull upwards to unfold the frame (do not pull up by the spotlights)

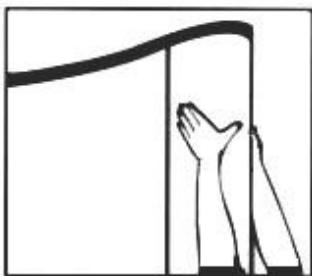

3. take the metal bars out of the case, fixe them together with the rounded end towards the top and push them together from the left until you hear them "click" into position

4. plug in the transformer

5. hang the front panels from the top and straighten them, to adjust them always release them at the bottom along the strengthened magnetic strip

6. hang the side panels from the top to bottom, fixing the magnetic strips with your hands on both sides simultaneously
7. remove the protective plastic cover from each panel from bottom to top and hang the panels
